DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Byszewski et al. (Byszewski), U.S. Patent 5,352,345.

The Byszewski patent discloses the claimed method and apparatus comprising the impurity separation subsystem, such as an ion exchange system, and a electrolytic membrane separation subsystem as claimed, wherein the membrane system recited within Byszewski meets the limitations of the claims (see claims 1-15 and figure 1).

Therefore, since the patent discloses each and every limitation, the claims are anticipated.
